

Consent for Surgery and Anesthesia

Patient's Name: _____ Date _____

Please initial each paragraph after reading. If you have any questions, please ask your doctor BEFORE initialing.

I hereby authorize Dr. Nizar Merheb and staff to perform the following procedure:

And to administer and the anesthesia I have chosen, which is:

Local Anesthesia

Local Anesthesia with Nitrous Oxide/ Oxygen Analgesia

Local Anesthesia with Oral Pre-medication

Local Anesthesia with Intravenous Sedation

General Anesthesia

Other treatment options: _____

I understand that there are known consequences of surgery and the administration of drugs and anesthetics that include (but are not limited to): pain and discomfort, swelling, bleeding, bruising, and infection. Changes in the bite or restricted mouth opening secondary to stress on the jaw joint (TMJ) may occur. There is also the possibility of injury to adjacent teeth or other tissues of the face or mouth, bone/jaw fractures, delayed healing, dry socket, or unexpected drug reactions or allergies.

With tooth extraction, I understand that there may be unexpected damage to adjacent teeth or fillings, sharp ridges or bone splinters that may require later surgery to smooth or remove, dry socket which will require additional care or small fragments of tooth root which may be left in place to avoid damage to vital structures such as nerves or sinus.

Lower tooth roots may be very close to the nerve and surgery may result in pain or a numb feeling of the chin lip, cheek, gums, teeth or tongue (including possible loss of taste sensation) lasting for weeks, months, or may rarely be permanent. On upper teeth where roots are close to the sinus, a sinus infection may develop, a root tip may enter the sinus and/or an opening from the mouth to the sinus may occur which could require later medication or surgery.

I understand that no guarantee can be promised and I give my free voluntary consent for treatment. I realize that my doctor may discover conditions requiring different surgery from that which was planned, and I give my permission for those additional procedures that are advisable in the exercise of professional judgment.

ANESTHETIC RISKS include: discomfort, swelling, bruising, infection, and allergic reactions. There may be inflammation at the site of an intravenous injection (phlebitis) that may cause prolonged discomfort and/or disability, and may require special care. Nausea and vomiting, although uncommon may be unfortunate side effects of IV anesthesia. Intravenous anesthesia is a serious medical procedure and, although considered safe, carries with it the rare risks of heart irregularities, heart attack, stroke, brain damage or death.

Your obligations if IV Anesthesia is used

Because anesthetic medications cause prolonged drowsiness, you MUST be accompanied by a responsible adult to drive you home and stay with you until you are recovered sufficiently to care for yourself. This may be up to 24 hours.

During recovery time (24 hours) you should not drive, operate complicated machinery or devices, or make important decisions such as signing documents, etc.

You must have a completely empty stomach. IT IS VITAL THAT YOU HAVE NOTHING TO EAT OR DRINK SIX (6) HOURS PRIOR TO YOUR ANESTHETIC. **TO DO OTHERWISE MAY BE LIFE-THREATENING!**

However, it is important that you take any regular medications (high blood pressure, antibiotics, etc.) or medications provided by this office, **using only a sip of water.**

Information for Female Patients I have informed my doctor about my use of birth control pills. I have been advised that certain antibiotics and other medications may neutralize the prevention effect of birth control pills, allowing for conception and pregnancy. I agree to consult with my personal physician to initiate additional forms of birth control during the period of treatment, and to continue those methods until advised by my personal physician that I can return to the use of oral birth control pills.

Consent

My signature below signifies that all questions have been answered to my satisfaction regarding this consent and I fully understand the risks involved of the proposed surgery and aesthesia. I certify that I speak, read and write English.
